

ROLLPACK RL2000**PRE**

ROLL PACKING MACHINE FOR INNERSPRING UNITS
WITH PRE-COMPRESSION FEEDING TABLE

The solution of Roll Packing very tall spring units, of up to 22cm height.

Using one operator even for very large and heavy spring units.
Suitable for all types of spring units, bonnel, pocketed etc.
No additional paper is needed to compress the unit.
No operator skills are required for roll packing.
Fast, easy to operate, no training, minimal installation.
Avoiding possible damage during roll packing.

The springs are pre-compressed and then fed
at the correct angle and height into the machine, between
the main mandrel and the compression roller.

The machine features all facilities of the other models, RL2000EH and RL2000A.
Automatic paper feeding on starting, vacuum system
holding the paper on the mandrel, automatic strapping, etc.

specifications

- Fully computerised feeding table synchronised with the rolling feeding speed.

- Height table adjustment to optimise the correct feeding angle in the machine.

- Optional paper extension stand, to enable the use of 2 additional paper rolls (or other wrapping material), or rolls of up to 120cm in diameter.

Mandrel standard diameter 240mm.
Other diameters are available on demand.

Electrical power consumption : Maximum 7.5kW.
Electrical supply must be specified upon order.

Compressed air supply needed : 6 kg/cm2
with consumption of about 0.01m3 per bale.

Weight: Main machine 3500 kg
Feeding table 600 kg
Additional paper stand 220 kg (optional)

CE Certification of safety: The machine is protected with safety guards, interlocks, sensors, accident safety devices, emergency stops and head on collision stop thus enabling safe operation.
